
INDIANA COMMISSION ON PROPRIETARY EDUCATION

Board of Commissioners Meeting Memorandum

Date: February 7, 2006

From: Rebecca Carter, Director of Regulatory Compliance

**Subject: DEVRY UNIVERSITY - MERRILLVILLE
NEW DEGREE APPLICATION & DEGREE RENEWAL APPLICATION**

Staff Recommendation

The staff recommends that DeVry University - Merrillville be given the authority to award the Associate of Applied Science degree and to renew its authority to award the Master of Science degree in the following programs:

AAS – Network Systems Administration

MS – Information Systems Management

Background Information

DeVry University is accredited by North Central Association of Colleges and Schools and this institution has been operating in Merrillville, Indiana since 1997.

The Associate of Applied Science degree program consist of 67 semester-credit hours of training; a minimum of 75% of the courses are in the Specialty; and, the faculty meet the criteria as stipulated in 570 IAC1-10.1-4 Associate of Science criteria.

The Master of Science degree program consists of 45 semester-credit hours of training. All of the faculty members holds a master's degree or above.

INDIANA COMMISSION ON PROPRIETARY EDUCATION

DEGREE APPLICATION

NAME OF INSTITUTION: DeVry University - Merrillville

NAME OF PROGRAM: Network Systems Administration

DEGREE LEVEL: (Designate one)

(AAS, AA, AS, BAS, BA, BS, MBA, MS, MA, MAS, Ph.D.) AAS

Name of Person preparing this Form: Marcy L. Tadla, Manager, State & Provincial Licensing

Date the form was prepared: January 2006

I. PROGRAM OBJECTIVES: (Describe what the program is designed to achieve and explain how it is structured in order to accomplish the objectives.)

The Network Systems Administration program provides students with a background in network systems administration as applied to practical business situations. The program addresses installing, configuring, securing and administering network systems comprising users, shared resources and network elements, such as routers, in local and Internet-based environments.

The NSA program is designed to produce graduates who are able to:

- *Establish and administer a network by installing, configuring, securing, and testing multiple network operating systems and selected hardware such as network servers and routers.*
- *Demonstrate teamwork skills.*
- *Apply research and problem-solving skills.*

II. PROGRAM STRUCTURE: (List all courses in the program. Indicate course name, number, Credit hours or clock hours for each course.)

NAME OF PROGRAM: Associate of Applied Science in Network Systems Administration

TOTAL CREDIT or CLOCK HOURS: 67 credit hours ^

(For credit hours, Check quarter or semester): Quarter Hours: _____ or Semester Hours: ✓

LENGTH OF PROGRAM: 75 weeks TUITION: \$29,775 (includes \$50 application fee)

- 4. Other library facilities/resources available to the student:**

Please see attached Library Resource Plan

DeVry University Library Plan

Mission, Objectives, and Policies

The mission of DeVry University libraries is to support the educational goals and instructional needs of the programs by providing professional reference services and information resources to supplement classroom and laboratory learning, as well as to participate in the teaching/learning environments of the campuses, centers, and on-line operations with the goal of contributing to the development of student applied research skills and information literacy competencies.

DeVry University recognizes that today's working adult students have complex, time-constrained lifestyles and have come to depend heavily on electronically accessed resources, and that there is a rapidly increasing amount of information available to them electronically. To support the campus libraries and the undergraduate and graduate students at our centers and on-line through both electronic and print resources, we employ full-time professional library staff to maintain print and electronic resources, manage reference services, and recommend additional resources that will best meet the research needs of students and faculty.

Staff and Administration

Librarian support for DeVry University's centers is comprised of the library services director and the library systems director working together to support both undergraduate and graduate student and faculty needs.

John Small is the DeVry University library services director. Mr. Small has a Master of Arts in Library and Information Science from Northern Illinois University. He has fourteen years academic library experience and knowledge from Central Missouri State University where he served as the electronic resources librarian and assistant professor of library services.

The university library services director manages the library resources from a central location in Oakbrook Terrace, Illinois. He reports to the DeVry University director of general education and libraries and is responsible for the following key services:

- Expand and upgrade print and electronic resources
- Coordinate and maintain a real-time Digital Reference program for all DeVry University students with 46 hours of availability per week
- Develop a library instruction program supporting planned library assignments across the curriculum
- Develop resource-sharing arrangements with campus libraries for center-based students in metro areas and beyond
- Market library services to graduate students, faculty, and staff
- Work with campus librarians to ensure equality of access to information, particularly within metro settings

The university library services director works closely with the graduate faculty and staff, and the university's campus-based librarians to ensure that library materials and services support students with their applied business research and other assignments, and assists faculty with their research needs.

As chair of the graduate-school Library Committee, the university library services director works with four colleagues (two faculty members and two program managers) for the purposes of collection development, planning, marketing, and policy development. This committee meets twice annually via

Web conferences. End-of-term faculty survey information is used to continually fine-tune collection development efforts.

The university library systems director administers the on-line union catalog system (Voyager) for DeVry University. He also reports to the director of general education and libraries, and works with the library services director to facilitate use of the system-wide and local print resources accessible via Voyager.

Paul Anderson fills this library systems director's role. Mr. Anderson has a Master's of Library Science from San Jose State University. Prior to joining DeVry, Mr. Anderson worked for over 15 years at Alameda County Library as Young Adult Librarian (1990-93), Technical Services Manager (1993-98), and Adult Services Librarian (1998-2000), and is a former library director for the DeVry University Fremont campus (2000-2002).

The Library Collection & Collection Organization

On-line Resources

All DeVry University students, faculty, and staff have access to the extensive and comprehensive ProQuest 5000 suite of databases (journal articles, newspapers, and data) along with the Faulkner FACCTS and Hoover's databases through the Web site (<http://library.devry.edu/>). There are also two collections of electronic books available at this location from netLibrary and Safari (Pearson). Students and faculty at the centers and from any Internet-connected computer have access to these resources 24 hours a day, seven days a week.

By accessing the DeVry University library Web site, students can search an extensive collection of newspapers, journals, periodicals, data sets, vendor information, and other resources via an online connection. Articles can be delivered several ways: printed, faxed, mailed, or downloaded. Included in these provisions are links to course-related Internet sites that have been recommended by faculty and central academic staff, and that have been reviewed and annotated by librarians.

A listing of the online resources available to DeVry University students is attached.

The library also provides an entry point for the Thompson Learning NETg computer-based training courses. These 1300+ Web-based short courses are free to our students, faculty, staff, and KGSM alumni. These concise, professionally developed business e-learning courses are in the areas of project management, Microsoft Office Suite, Java programming, networking, Web development, and interpersonal communication skills practice.

On-site Library Resources

Each DeVry University Center has an information center that includes networked personal computers, a printer and printed resources such as alternative textbooks and study guides, current business management reference books, and self-improvement books. Periodicals are also available for use by students. At a minimum, the library subscribes to the following core periodicals for each center:

Business Week
Harvard Business Review
HR Magazine
Journal of Accountancy
PC Magazine
Wall Street Journal

The library also subscribes to a local business publication for each center, for example Crain's Chicago Business in the Chicago-area market; the Atlanta Business Chronicle in Georgia; Business First in

Columbus, Ohio; and Crain's New York Business in New York; and the Charlotte Business Journal in North Carolina.

Students are also provided information to help them access varied resources from their local public libraries, plus any additional library consortia that may be in place in the area. The library services director coordinates access with the center dean and ascertains the level of support that already exists in community libraries.

DeVry University Interlibrary Services and Collection Sharing

Our library includes the full integration of graduate and undergraduate resources, borrowing access to all holdings in the Voyager union catalog for all students, and a real-time digital reference service for enhanced patron support, particularly for students and faculty at DeVry University centers and online. The digital reference service is coordinated and maintained by the library services director but also leverages the reference services of our campus professional librarians.

The sharing of resources across the undergraduate and graduate levels includes an ongoing strategy for building collections that also support the graduate programs (5-10% of annual acquisitions are identified as directly supporting the graduate programs), and developing a patron-identification capability to allow graduate and undergraduate students to borrow items directly via the Voyager catalog system

Currently, borrowing of print resources by students is established through "manual" arrangements between centers and campuses in each region. Physical delivery of resources from the campuses to the centers must also be arranged, and is handled through the normal staff/faculty travel across a metro region, through courier services, or through express mail.

Planning, Service, and Use

Strategic planning for the libraries of DeVry University is conducted in concert with the strategic planning process of DeVry University, which is an ongoing, forward-looking process with a 5-year window of coverage. The process is guided by the senior management of the university, but draws on a broad base of inputs from campus, center, and on-line personnel, including faculty, staff, and students. The library's strategic plan, similarly, draws on the campus-based professional librarians, their Library Committees (primarily faculty), campus and center staff, and students. These inputs are channeled to the Library Strategic Planning Committee, which analyzes and evaluates input and recommends specific adjustments and initiatives. These recommendations are integrated into the annual planning cycles led by the director of general education and libraries, the university library services director, and the university library systems director in their proposals to senior management of the university.

Each term, to promote awareness and provide training on library services, the university library services director sends materials to center staff to distribute to all incoming students describing resources and services available to them through the library. The librarian also provides handouts to faculty to build awareness of the resources and services available.

To evaluate the range and quality of library resources, both electronic and print, the library systems director compiles usage reports monthly from the netLibrary Web site in the areas of frequency of use by title, most popular titles in the past 30 days, and "turnaways." In addition, as part of the ongoing development and review of library resources, the librarian surveys both faculty and students as part of the end-of-term surveys administered at the centers. Survey results indicate students are able to complete their coursework and applied research with support of the School's library resources as well as the vast amount of information available through the Web.

Campus-based librarians also track usage of print and electronic resources and library services, such as bibliographic instruction sessions, on a term-by-term basis. The director of general education and libraries and other administrators analyze these data, and adjustments in library resources and services are made as a result. In the past six years, three comprehensive library surveys of students and faculty were conducted across the university system. The results indicated that both students and faculty were satisfied with library resources and the helpfulness and accessibility of library staff.

Library use statistics are gathered for a number of different purposes and in a variety of formats. General statistical information for 2004-05 includes the following overview. These figures are university-wide statistics.

Total circulation via the Voyager system: 148,989

Total circulation of netLibrary e-books: 51,738

Total use of subscribed electronic resources (including searches and full-text articles retrieved): 3,131,800

Graduate student usage of ProQuest databases: 272,038 searches and 289,284 documents retrieved.

INDIANA ADDENDUM

A signed and dated copy of this addendum, countersigned by the advisor, must be attached to the undergraduate academic catalog and enrollment agreement of every undergraduate student enrolled from the State of Indiana. The third copy is to be forwarded to DeVry's administrative office with the application paperwork.

This institution is regulated by **The Indiana Commission on Proprietary Education**, 302 West Washington Street, Room E201, Indianapolis, IN 46204-2767. Toll Free Number 1-800-227-5695 or (317) 232-1320.

Indiana Minimum Cancellation and Refund Policy

The postsecondary proprietary education institution shall pay a refund to the student in the amount calculated under the refund policy specified in this section or as otherwise approved by the commission. The institution must make the proper refund no later than thirty-one (31) days of the student's request for cancellation or withdrawal.

The following refund policy applies to each resident postsecondary educational institution:

The student is entitled to a full refund if one or more of the following criteria are met:

- A. The student cancels the enrollment application within six (6) business days after signing.
- B. The student does not meet the school's minimum admission requirements.
- C. The student's enrollment was procured as a result of a misrepresentation in the written materials utilized by the school.
- D. If the student has not visited the school prior to enrollment and withdraws within three days of touring the school or attending the regularly scheduled orientation/classes.

After beginning classes, Indiana residents who withdraw from the school are entitled to the following refund amounts less an enrollment fee of ten percent (10%) of the total tuition, not to exceed one hundred dollars (\$100):

- A. After attending one week or less, ninety percent (90%).
- B. After attending more than one week but equal to or less than twenty-five percent (25%) of the program, seventy-five percent (75%).
- C. After attending more than twenty-five percent (25%) but equal to or less than fifty percent (50%) of the program, fifty percent (50%).
- D. After attending more than fifty percent (50%) but equal to or less than sixty percent (60%) of the program, forty percent (40%).
- E. After attending more than sixty percent (60%) of the program, the student is not entitled to a refund.

INDIANA COMMISSION ON PROPRIETARY EDUCATION

DEGREE APPLICATION

RECEIVED

JAN 25 2006

INDIANA COMMISSION ON
PROPRIETARY EDUCATION

NAME OF INSTITUTION: DeVry University - Merrillville

NAME OF PROGRAM: Information Systems Management

DEGREE LEVEL: (Designate one)

(AAS, AA, AS, BAS, BA, BS, MBA, MS, MA, MAS, Ph.D.) MS

Name of Person preparing this Form: Marcy L. Tadla, Manager, State & Provincial Licensing

Date the form was prepared: January 5, 2006

I. PROGRAM OBJECTIVES: (Describe what the program is designed to achieve and explain how it is structured in order to accomplish the objectives.)

The Master of Information Systems program equips students with the skills necessary to effectively function as Information systems managers responsible for supervising the work of systems analyst, computer programmers and support specialists.

Students in the 15-course (45-semester-credit-hour) program must complete six management core courses, five technology core courses, including an integrative capstone course; and four elective courses form the designated specialty (concentration) area.

MISM coursework specifically addresses topics such as:

- *Management foundations*
 - *using core concepts of accounting & finance*
 - *utilizing technology & innovations as competitive & strategic tools*
 - *managing change to improve effectiveness*
 - *understanding the principles and methodology of project management.*
- *Technology foundations*
 - *understanding concepts & tools for networking, systems development, implementation, management & systems security.*
 - *Examining database concepts, components & management issues.*

In addition, students may choose to concentrate in one or more of the following areas:

- Information security
- Data Administration & Management
- Health Information Systems Management
- Global Outsourcing Management
- Information Systems Tools
- Project Management
- Electronic Commerce
- Distributed Systems Management
- Information Systems Applications
- Network Management

Specific MISM program objectives include:

- developing and enhancing the business, technical and management skills students need to function effectively as IS managers.
- enabling students to identify opportunities to use information systems to an organization's strategic and competitive benefit.
- providing critical learning tools for application development, operational effectiveness and information asset management, and decision making.
- preparing students to analyze and design computer/network-based applications of information technology and manage IS resources.
- developing project management skills needed to manage projects and execute project tasks with respect to IS.

II. PROGRAM STRUCTURE: (List all courses in the program. Indicate course name, number, Credit hours or clock hours for each course.)

NAME OF PROGRAM: Master of Information Systems Management

TOTAL CREDIT or CLOCK HOURS: 45 Credit hours

(For credit hours, Check quarter or semester): Quarter Hours: _____ or Semester Hours: ✓

LENGTH OF PROGRAM: 16 weeks/term TUITION: \$1750/course

SPECIALTY COURSES:

Course Number	Course Title	Credit Hours	OR	Clock Hours

DeVry University Library Plan

Mission, Objectives, and Policies

The mission of DeVry University libraries is to support the educational goals and instructional needs of the programs by providing professional reference services and information resources to supplement classroom and laboratory learning, as well as to participate in the teaching/learning environments of the campuses, centers, and on-line operations with the goal of contributing to the development of student applied research skills and information literacy competencies.

DeVry University recognizes that today's working adult students have complex, time-constrained lifestyles and have come to depend heavily on electronically accessed resources, and that there is a rapidly increasing amount of information available to them electronically. To support the campus libraries and the undergraduate and graduate students at our centers and on-line through both electronic and print resources, we employ full-time professional library staff to maintain print and electronic resources, manage reference services, and recommend additional resources that will best meet the research needs of students and faculty.

Staff and Administration

Librarian support for DeVry University's centers is comprised of the library services director and the library systems director working together to support both undergraduate and graduate student and faculty needs.

John Small is the DeVry University library services director. Mr. Small has a Master of Arts in Library and Information Science from Northern Illinois University. He has fourteen years academic library experience and knowledge from Central Missouri State University where he served as the electronic resources librarian and assistant professor of library services.

The university library services director manages the library resources from a central location in Oakbrook Terrace, Illinois. He reports to the DeVry University director of general education and libraries and is responsible for the following key services:

- Expand and upgrade print and electronic resources
- Coordinate and maintain a real-time Digital Reference program for all DeVry University students with 46 hours of availability per week
- Develop a library instruction program supporting planned library assignments across the curriculum
- Develop resource-sharing arrangements with campus libraries for center-based students in metro areas and beyond
- Market library services to graduate students, faculty, and staff
- Work with campus librarians to ensure equality of access to information, particularly within metro settings

The university library services director works closely with the graduate faculty and staff, and the university's campus-based librarians to ensure that library materials and services support students with their applied business research and other assignments, and assists faculty with their research needs.

As chair of the graduate-school Library Committee, the university library services director works with four colleagues (two faculty members and two program managers) for the purposes of collection development, planning, marketing, and policy development. This committee meets twice annually via

Web conferences. End-of-term faculty survey information is used to continually fine-tune collection development efforts.

The university library systems director administers the on-line union catalog system (Voyager) for DeVry University. He also reports to the director of general education and libraries, and works with the library services director to facilitate use of the system-wide and local print resources accessible via Voyager.

Paul Anderson fills this library systems director's role. Mr. Anderson has a Master's of Library Science from San Jose State University. Prior to joining DeVry, Mr. Anderson worked for over 15 years at Alameda County Library as Young Adult Librarian (1990-93), Technical Services Manager (1993-98), and Adult Services Librarian (1998-2000), and is a former library director for the DeVry University Fremont campus (2000-2002).

The Library Collection & Collection Organization

On-line Resources

All DeVry University students, faculty, and staff have access to the extensive and comprehensive ProQuest 5000 suite of databases (journal articles, newspapers, and data) along with the Faulkner FACCTS and Hoover's databases through the Web site (<http://library.devry.edu/>). There are also two collections of electronic books available at this location from netLibrary and Safari (Pearson). Students and faculty at the centers and from any Internet-connected computer have access to these resources 24 hours a day, seven days a week.

By accessing the DeVry University library Web site, students can search an extensive collection of newspapers, journals, periodicals, data sets, vendor information, and other resources via an online connection. Articles can be delivered several ways: printed, faxed, mailed, or downloaded. Included in these provisions are links to course-related Internet sites that have been recommended by faculty and central academic staff, and that have been reviewed and annotated by librarians.

A listing of the online resources available to DeVry University students is attached.

The library also provides an entry point for the Thompson Learning NETg computer-based training courses. These 1300+ Web-based short courses are free to our students, faculty, staff, and KGSM alumni. These concise, professionally developed business e-learning courses are in the areas of project management, Microsoft Office Suite, Java programming, networking, Web development, and interpersonal communication skills practice.

On-site Library Resources

Each DeVry University Center has an information center that includes networked personal computers, a printer and printed resources such as alternative textbooks and study guides, current business management reference books, and self-improvement books. Periodicals are also available for use by students. At a minimum, the library subscribes to the following core periodicals for each center:

Business Week
Harvard Business Review
HR Magazine
Journal of Accountancy
PC Magazine
Wall Street Journal

The library also subscribes to a local business publication for each center, for example Crain's Chicago Business in the Chicago-area market; the Atlanta Business Chronicle in Georgia; Business First in

Columbus, Ohio; and Crain's New York Business in New York; and the Charlotte Business Journal in North Carolina.

Students are also provided information to help them access varied resources from their local public libraries, plus any additional library consortia that may be in place in the area. The library services director coordinates access with the center dean and ascertains the level of support that already exists in community libraries.

DeVry University Interlibrary Services and Collection Sharing

Our library includes the full integration of graduate and undergraduate resources, borrowing access to all holdings in the Voyager union catalog for all students, and a real-time digital reference service for enhanced patron support, particularly for students and faculty at DeVry University centers and online. The digital reference service is coordinated and maintained by the library services director but also leverages the reference services of our campus professional librarians.

The sharing of resources across the undergraduate and graduate levels includes an ongoing strategy for building collections that also support the graduate programs (5-10% of annual acquisitions are identified as directly supporting the graduate programs), and developing a patron-identification capability to allow graduate and undergraduate students to borrow items directly via the Voyager catalog system

Currently, borrowing of print resources by students is established through "manual" arrangements between centers and campuses in each region. Physical delivery of resources from the campuses to the centers must also be arranged, and is handled through the normal staff/faculty travel across a metro region, through courier services, or through express mail.

Planning, Service, and Use

Strategic planning for the libraries of DeVry University is conducted in concert with the strategic planning process of DeVry University, which is an ongoing, forward-looking process with a 5-year window of coverage. The process is guided by the senior management of the university, but draws on a broad base of inputs from campus, center, and on-line personnel, including faculty, staff, and students. The library's strategic plan, similarly, draws on the campus-based professional librarians, their Library Committees (primarily faculty), campus and center staff, and students. These inputs are channeled to the Library Strategic Planning Committee, which analyzes and evaluates input and recommends specific adjustments and initiatives. These recommendations are integrated into the annual planning cycles led by the director of general education and libraries, the university library services director, and the university library systems director in their proposals to senior management of the university.

Each term, to promote awareness and provide training on library services, the university library services director sends materials to center staff to distribute to all incoming students describing resources and services available to them through the library. The librarian also provides handouts to faculty to build awareness of the resources and services available.

To evaluate the range and quality of library resources, both electronic and print, the library systems director compiles usage reports monthly from the netLibrary Web site in the areas of frequency of use by title, most popular titles in the past 30 days, and "turnaways." In addition, as part of the ongoing development and review of library resources, the librarian surveys both faculty and students as part of the end-of-term surveys administered at the centers. Survey results indicate students are able to complete their coursework and applied research with support of the School's library resources as well as the vast amount of information available through the Web.

Campus-based librarians also track usage of print and electronic resources and library services, such as bibliographic instruction sessions, on a term-by-term basis. The director of general education and libraries and other administrators analyze these data, and adjustments in library resources and services are made as a result. In the past six years, three comprehensive library surveys of students and faculty were conducted across the university system. The results indicated that both students and faculty were satisfied with library resources and the helpfulness and accessibility of library staff.

Library use statistics are gathered for a number of different purposes and in a variety of formats. General statistical information for 2004-05 includes the following overview. These figures are university-wide statistics.

Total circulation via the Voyager system: 148,989

Total circulation of netLibrary e-books: 51,738

Total use of subscribed electronic resources (including searches and full-text articles retrieved): 3,131,800

Graduate student usage of ProQuest databases: 272,038 searches and 289,284 documents retrieved.

**DeVry University
Keller Graduate School of Management
2005-2006 Academic Catalog Addendum
Volume IV**

October 6, 2005

The following replaces the corresponding information that appears on pages 74-75 of the catalog:

Withdrawals-Financial

Students are charged a \$50 administrative fee for each course from which they withdraw. Those who withdraw after registering for a session, or who are dismissed for disciplinary or academic conduct reasons, may be entitled to a tuition refund. Currently enrolled students whose academic status, given the results of the prior term, would have precluded their enrollment must drop the course and all payments will be refunded.

The official date of withdrawal is the date the school receives notification of withdrawal, not the last date of attendance. The session directly preceding the withdrawal request is used to identify the session of withdrawal. Students are responsible for officially withdrawing from a course. Failure to complete an official withdrawal may result in a grade of "F."

To comply with federal financial aid regulations, financial aid awards may be reduced based on withdrawal dates. Tuition refunds are computed independently from financial aid award calculations and return of funds.

Course withdrawal notices must be submitted to the center dean either in person or in writing. Simply ceasing to attend classes, notifying the instructor or notifying a staff member other than the center dean does not constitute a withdrawal of record. Students receiving financial aid should refer to Incremental Progress Requirements for Financial Aid Eligibility.

Refunds

Students who withdraw from a course may be entitled to a tuition refund. Refunds are paid within 30 days of notification of withdrawal and are returned in the same form as the initial payment. The refund amount is related to the date of withdrawal as indicated in the chart below, or to the last date of attendance if required by state law (California, Indiana, Nevada and Wisconsin students refer to your respective state addendum).

Withdrawal	Percent Refund**
Prior to class session 1	100
Prior to class session 2	87.5
Prior to class session 3	75.0
Prior to class session 4	62.5
Prior to class session 5	50.0+
Prior to class session 6	37.5+
Prior to class session 7	0
Prior to class session 8	0

** less \$50 administrative fee

+ First-session students receiving federal financial aid only. Continuing students refund is 0.

INDIANA ADDENDUM

A signed and dated copy of this addendum, countersigned by the advisor, must be attached to the undergraduate academic catalog and enrollment agreement of every undergraduate student enrolled from the State of Indiana. The third copy is to be forwarded to DeVry's administrative office with the application paperwork.

This institution is regulated by **The Indiana Commission on Proprietary Education**, 302 West Washington Street, Room E201, Indianapolis, IN 46204-2767. Toll Free Number 1-800-227-5695 or (317) 232-1320.

Indiana Minimum Cancellation and Refund Policy

The postsecondary proprietary education institution shall pay a refund to the student in the amount calculated under the refund policy specified in this section or as otherwise approved by the commission. The institution must make the proper refund no later than thirty-one (31) days of the student's request for cancellation or withdrawal.

The following refund policy applies to each resident postsecondary educational institution:

The student is entitled to a full refund if one or more of the following criteria are met:

- A. The student cancels the enrollment application within six (6) business days after signing.
- B. The student does not meet the school's minimum admission requirements.
- C. The student's enrollment was procured as a result of a misrepresentation in the written materials utilized by the school.
- D. If the student has not visited the school prior to enrollment and withdraws within three days of touring the school or attending the regularly scheduled orientation/classes.

After beginning classes, Indiana residents who withdraw from the school are entitled to the following refund amounts less an enrollment fee of ten percent (10%) of the total tuition, not to exceed one hundred dollars (\$100):

- A. After attending one week or less, ninety percent (90%).
- B. After attending more than one week but equal to or less than twenty-five percent (25%) of the program, seventy-five percent (75%).
- C. After attending more than twenty-five percent (25%) but equal to or less than fifty percent (50%) of the program, fifty percent (50%).
- D. After attending more than fifty percent (50%) but equal to or less than sixty percent (60%) of the program, forty percent (40%).
- E. After attending more than sixty percent (60%) of the program, the student is not entitled to a refund.
